PROFESSIONAL SUMMARY

Full-stack developer building scalable Web and Android applications with React, TypeScript, Node.js, GraphQL, Kotlin, and MongoDB. Experienced across the stack, from API and database design to responsive user interfaces with hands-on experience in micro-frontend architecture, authentication systems, CI/CD, and AI-powered features.

EDUCATION

Centennial College

Advanced Diploma with Honors in Software Engineering Technology

GPA: 3.53/4.00

Toronto, ON

Sept. 2023 – April 2026

EXPERIENCE

Web Consultant

Yorktown Family Services

July 2026 – Aug. 2026

Toronto, ON

- Consulted with Yorktown Family Services' Youth Advisory Committee (YAC) on website platform selection, recommending tools and technologies aligned with their organizational goals and technical capacity.
- Assessed data storage needs and recommended appropriate database solutions to support the organization's website requirements.
- Guided non-technical stakeholders through key technical decisions, translating requirements into actionable platform and tooling recommendations. Website currently in development based on consulting recommendations provided.

WORK EXPERIENCE

Bartender

The Real Jerk Restaurant

Part-time role balanced alongside full-time studies.

July 2025 – Present

Toronto, ON

PROJECTS

Community Hub | React, TypeScript, Vite, GraphQL, Apollo Client, Module Federation

March 2026 – April 2026

- Built a scalable micro-frontend platform using React, TypeScript, and Module Federation, enabling independent deployment and maintenance of application modules.
- Designed and integrated GraphQL services for Authentication, Community, and Events features, improving data management and system maintainability.
- Implemented Apollo Client for efficient API communication, caching, and state management across multiple modules.
- Enhanced user engagement by integrating AI-powered event summarization capabilities.

Cuisine Finder Mobile App | Kotlin, Jetpack Compose, Google Maps API, Android Studio

October 2025 – Nov. 2025

- Developed a native Android application that helps users discover and navigate to restaurants across Toronto using location-based services.
- Integrated Google Maps API to provide interactive maps, restaurant locations, and navigation functionality.
- Designed responsive and intuitive user interfaces using Jetpack Compose and modern Android development practices.
- Implemented category-based restaurant filtering to improve search efficiency and user experience.

Marketplace Web Application (Team Lead) | React, Node.js, Express.js, MongoDB, JWT, RESTful APIs

Nov. 2024

- Led a team in developing a full-stack marketplace platform using React, Node.js, Express.js, and MongoDB.
- Designed and implemented secure RESTful APIs for authentication, listing management, and user interactions using JWT-based authorization.
- Developed a scalable database architecture and role-based access controls to ensure secure ownership and management of marketplace listings.
- Built a CI/CD pipeline with GitHub Actions with automated test suite (21 tests, Jest/Supertest) with deployment to Render, completing in ~28 seconds end-to-end.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, Kotlin, Python, C#, SQL, CSS

Frontend: React, Vite, HTML5, CSS3, Jetpack Compose

Backend: Node.js, Express.js, GraphQL, REST APIs, Flask, Spring

Databases: MongoDB, MySQL, SQL Server

Tools & Platforms: AWS, Azure, Linux, Git, GitHub, Docker, Postman

Methodologies: Agile, Software Testing, Debugging, CI/CD Pipelines, Linear
